

ACCESSIBILITY INFORMATION FOR **PALMERSTON** CLINIC VISITORS

We are committed to making your visit as smooth and comfortable as possible. Please note that our current clinic layout includes a hallway section that is **32.5 inches** wide. There is also a **90-degree turn** into the testing room, with a hallway width of **36 inches** at the turn.

If you use a wheelchair or mobility scooter, we kindly ask that you check whether your device can comfortably navigate these dimensions. If this may present any difficulty, we would be happy to schedule your appointment at our fully accessible Elmira location, which can accommodate larger mobility devices.

Please contact us if you have any questions or need assistance arranging an appointment.
